MOBILE FILLING DEVICE 3200 MINI

**Right of way for mobile service.
The SYR Mobile Filling Device 3200 Mini –
Filling heating installations made simple!**

Innovative solutions for smart people

Perfectly sophisticated, perfectly arranged – the smart case for mobile solutions.

Ready to hand when needed and you are all set: The SYR Mobile Filling Device 3200 mini includes everything you need to fill or refill your heating installation in the smallest of spaces. The most important part is the new SYR Connection Center 3200 All-in-One, which already features the type BA backflow preventer, isolating valves, pressure reducing valves and a blending device – simply All-in-One. In addition, with our smart cartridge system, you can fill your heating installation with softened or fully demineralised water – exactly according to the manufacturer's instructions.

SYR Mobile Filling Device 3200 Mini

- ideal for small quantities in mobile heating water conditioning
- everything you need for variable and safe use during filling on-site:
 - Connection Center 3200 All-in-One with
 - Type BA backflow preventer

Maintenance and servicing: easy to shoulder

These ideas will make life more simple for the installer. SYR's Mobile Filling Device 3200 Mini renders maintenance and servicing more mobile than ever.

The practical blue case is lightweight and easy to carry with its carrying strap. It is a particularly convenient service solution for refilling self-contained central heating systems.

Filling water quality of your choice – softening or demineralising

Softening or complete demineralisation – no problem with the SYR Mobile Filling Case 3200 Mini. Simply insert the suitable cartridge into the installation. You can choose between the HWE cartridge (softening), the HVE (complete demineralisation) or the HVE Plus cartridge (complete demineralisation with pH-stabilisation). Simply refill empty cartridges with replacement resin.
